Noncitrus Fruits and Nuts

1994 Preliminary

Utilized Production Up 2 Percent, Value Down 2 Percent

The Nation's utilized production of the leading noncitrus fruit crops, excluding avocados and guavas, totaled 16.9 million tons in 1994, up 2 percent from 1993. Larger crops of apples, apricots, bananas, sweet and tart cherries, cranberries, nectarines, pears, strawberries, California plums, California prunes, and other prunes and plums were produced. Utilized production decreased for berries, figs, grapes, kiwifruit, olives, papayas, peaches, and pineapples. Utilized production of dates remained unchanged.

Value of utilized production for noncitrus fruit crops totaled \$6.02 billion, down 2 percent from 1993. In calculating this value, season average prices for 1993 were used for tart cherries, cranberries, kiwifruit, and California prunes multiplied by the 1994 production. The values used for avocados and guavas are the same as the 1993 estimates. Actual values for these commodities will be published on July 7, 1995.

Apple production for 1994 was estimated at 10.9 billion pounds, 2 percent more than 1993 and 3 percent above 1992. Commercial apple production in Washington increased 14 percent from last year, making it their largest crop on record.

All grape production for 1994 was estimated at 5.93 million tons, down 2 percent from both the 1993 and 1992 crops. California's production was down 1 percent from last year. Large increases in New York and Pennsylvania production were offset by a large decrease in Washington.

Peach production was set at 2.51 billion pounds, down 6 percent from both last year and 1992. Production of the crop was affected by an extremely cold winter, especially in Indiana, Kentucky, Ohio, Pennsylvania, and West Virginia where no significant production was recorded in 1994 due to freeze damage.

Pear production was placed at 1.04 million tons, 9 percent more than 1993 and 12 percent above 1992. The Pacific States (California, Oregon, and Washington), which accounted for 97 percent of the U.S. pear production, enjoyed favorable conditions throughout most of the growing season.

Nut Production Drops 4 Percent, Value Down 15 Percent

The 1994 U.S. nut production decreased 4 percent to 949,100 tons. Pecan production decreased 52 percent from last year. Smaller crops of hazelnuts, pistachios, and walnuts were produced. Utilized production increased this year for almonds and macadamia nuts. Almond production equaled record high crops of 1987 and 1990.

The 1994 value of utilized production for the six crops totaled \$1.45 billion, down 15 percent from last year. The value of the walnut crop was estimated using 1994 production and 1993 season average prices. Values were lower for almonds, hazelnuts, pecans, and pistachios. Values were higher for macadamia nuts.

Noncitrus Fruits and Nuts: Bearing Acreage and Yield per Acre,
by Crop, United States, 1992-94

Total	675,930	676,130	688,400	--	--	--

1/ Bearing acreage estimates are primarily based on periodic orchard and vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications. 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions. 3/ Estimates for 1994 will be published on July 7, 1995. 4/ Yields not calculated because only utilized production is estimated. 5/ Harvested acreage. 6/ In 1994, no acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID). There were 20,000 acres in 1993 and 12,500 in 1992. These acres have been deducted from bearing acres for yield calculations. 7/ Pineapple acreage is total acres in crop, not harvested acreage. Pineapple yields are not estimated. 8/ Idaho, Michigan, Oregon, and Washington. 9/ Excludes avocados and guavas for 1994. 10/ Nut yields are based on utilized production, not total production.

Total				865.6	984.8	949.1

1/ Total production includes utilized production plus production not harvested and production harvested but not sold due to economic conditions.

2/ Tons refer to the 2,000 pound short ton.

3/ Estimates for 1994 avocado and guava production will be available July 7, 1995.

4/ Only utilized production is estimated for papayas.

5/ Idaho, Michigan, Oregon, and Washington.

6/ Production converted to in-shell equivalent tons using industry shelling ratios.

^{1/} Data not published for some States to avoid disclosure of individual operations. ^{2/} Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications. ^{3/} Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.

^{1/} Bearing acreage estimates are primarily based on periodic vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.

^{2/} Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.

^{3/} In 1994, no acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID). There were 20,000 acres in RID in 1993 and 12,500 acres in 1992. These acres have been deducted from bearing acres for yield calculations.

1/ Data not published for some States to avoid disclosure of individual operations.

2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.

3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.

4/ No significant commercial production in 1994 due to freeze damage.

Definitions of Terms

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Unutilized Production - is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - orchards of 100 or more bearing age trees.

Prices - are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **marketing year average price (MYAP)** is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit **average price as sold** is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington, New York (apples only) and Oregon (except peaches) which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.o.b. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries and California olives and clingstone peaches which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year.

The following procedure is used to compute State values for all commodity groups:

State Value Computation Procedure

Fresh Market Value = Fresh Market MYAP x Fresh Market Utilization
Process Market Value = Process Market MYAP x Process Market Utilization
"All" Sales Value = Fresh Market Value + Process Market Value
"All" Sales MYAP = "All" Sales Value Divided By
"All" Sales Utilization

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure. The procedure used for computation of U.S. Marketing Year Average Prices follows:

U.S. MYAP Computation Procedure

Fresh Market MYAP = Fresh Market Value For All States Divided By
Fresh Market Utilization For All States
Process Market MYAP = Process Market Value For All States Divided By
Process Market Utilization For All States
"All" Sales MYAP = Sales Value For All States Divided By
Sales Utilization For All States

Fruits (Noncitrus): Marketing Seasons for Specified Crops 1/

Apples: All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California. June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.

Apricots: **Fresh Fruit** -- May 25 to August 20.
Canning -- June 15 to August 15.
Dried -- California, June 20 to August 20.

Avocados: California -- November 1 to November 30 (following year).
Florida -- June 20 to Feb 28.

Bananas: January 1 to December 31.

Cherries: **Fresh Fruit** -- Sweet varieties, May 1 to August 15;
Tart varieties, June 15 to August 20.

Cranberries: September 5 to December 20.

Dates: August 15 to March 15.

Statistical Bulletin Order Form

The U.S. Department of Agriculture's National Agricultural Statistics Service will publish a series of 18 Statistical Bulletins (SB895-SB912) containing final estimates for the 1987-1993 period. Data previously published during the 1987-1993 period have been reviewed against survey indications and administrative data such as those from exports, imports, slaughter, crushings, and the 1992 Census of Agriculture. These bulletins are a continuation of Statistical Bulletins (SB792-SB802) published in 1988 and 1989.

QUANTITY (\$10 each)		BULLETIN NUMBER	STATISTICAL BULLETIN	RELEASE DATE
PAPER	DISKETTES			
		SB-904	Hogs and Pigs, 1988-1992	12/16/94
		SB-896	Field Crops, 1987-1992	12/19/94
		SB-897	Stocks of Grains, Oilseeds, and Hay, 1988-1993	12/19/94
		SB-898	Rice Stocks, 1988-1993	12/19/94
		SB-902	Vegetables, 1987-1992	01/06/95
		SB-906	Sheep and Goats, 1989-1993	01/13/95
		SB-908	Chicken and Eggs, 1988-1993	01/18/95
		SB-905	Cattle, 1989-1993	01/20/95
		SB-909	Milk, 1988-1992	02/02/95
		SB-911	Turkeys, 1988-1993	03/23/95
		SB-912	Honey, 1986-1992	03/28/95
		SB-907	Meat Animals, PDI, 1988-1992	03/30/95
		SB-910	Poultry Production and Value, 1988-1993	05/12/95
		SB-900	Noncitrus Fruits and Nuts, 1987-1992	06/05/95
		SB-895	Farms and Land in Farms, 1987-1993	07/28/95
		SB-899	Citrus Fruits, 1987-1992	08/07/95
		SB-901	Potatoes and Sweetpotatoes, 1987-1992	08/17/95
		SB-903	Crop Values, 1987-1992	09/25/95
		Add 25% for shipment to foreign addresses (includes Canada) (Total Bulletins Ordered X \$10 = TOTAL COST \$ _____)		

Publications may be obtained in hard copy or on diskette by calling the ERS-NASS order desk toll free at 1-800-999-6779 or by mail from ERS-NASS, 341 Victory Drive, Herndon, VA 22070.

Bulletins cost \$10.00 each for paper products or 3.5" ASCII diskettes. To order bulletins by mail, return this form along with your **check payable to ERS-NASS**. The bulletins will also be available on Internet through the Mann Library at Cornell University (gopher.usda.mannlib.cornell.edu 70) at no charge.

Thank you for your order.
